

Presentation Velomobile seminar

20 years of velomobile development in Dronten in 30 Minutes:

By Theo van Andel

The interesting story about velomobile development in Dronten, how it all started

Me, Allert Jacobs and Ymte Sijbrandij first started working at Flevobike in the early 90's and later started Velomobiel.nl . We have been building velomobiles now for almost 20 Years. This resulted, I think, in an interesting period of velomobile development worth telling a story.

In this period 8 Models have been developed and produced. Chronologically: Flevo-Alleweder, carbon-Alleweder(Limit), 20"Quest, Mango, 26"Quest, Strada, Carbon-Quest and Quest-XS.

I would like to place 1 of all vehicles in the room or hall for people to see.

I describe each vehicle shortly and explain design choices, give production numbers and interesting anecdotes.

I explain shortly how dronten became the capital of velomobiles.

I would like to use a beamer to show relevant pictures or graphics during the lecture, the audience can ask questions ofcourse and I'll include some humor here and there.

Please let me know if you would like me to give this lecture.

Greetings

Theo van Andel
